- Custom Card Design
- Figures Store

By NodeJs:-

- **Simple shop:** Using (Ejs) ([GitHub](#))
- **Ebtekar:** Using (rest-apis) ([GitHub](#))
- **TAGO:** Using (GraphQL) ([GitHub](#))

WORK EXPERIENCE

Alliance Visions

JUN 2021 – Present Remotely, Saudi Arabia

- Designing, developing, and maintaining mission critical Laravel-based web applications.
- Architected and optimized backend systems, resulting in reduced response times or increased system reliability.
- Collaborated closely with frontend teams, UI/UX designers, and QA engineers to ensure seamless project execution and delivery.
- Implemented robust API solutions that facilitated data exchange with internal and external systems.

EbtekarStore

JULY 2020 – Present Freelancer

- A developed e-commerce website is a fully functional online platform that enables businesses to showcase and sell their products or services to customers over the internet. It typically includes features such as user-friendly navigation, secure payment processing, product categorization, search functionality, customer reviews, and a seamless shopping cart system. A well-developed e-commerce website provides a smooth and efficient shopping experience for customers, helping businesses expand their online presence and boost sales.

Shamii Marketing

JAN 2020 – JUN 2020 On Site, Cairo

- Working as Backend Developer Using Laravel with Restful API
- Worked collaboratively with a team of developers to complete the project on schedule to ensure we achieve SOLID principles
- Continuously researched and learned new technologies and techniques to stay up-to-date with industry trends and best practices.
- Created detailed documentation outlining the application's functionality and technical specifications.
